

# SMART RS232 TO MODBUS TCP CONVERTER-B TTL

- Smart RS232 to Modbus TCP Converter. Users can easily get RS232 Serial data in their MODBUS TCP/IP network.
- The Modbus TCP interface ensures reliable communication and easy access to serial data over long distances.
- Enables reliable long-distance communication .
- All RS232 parameters, including baud rate, data bits, stop bits, and parity, can be configured through Modbus registers or via the web interface.

## Features & Specifications

### Serial Interface

|            |                      |
|------------|----------------------|
| Interface  | RS232                |
| Data Rates | 300 to 115200 bps    |
| Data Bits  | 7 or 8               |
| Parity     | Odd, Even& No Parity |
| Stop Bits  | 1 or 2               |

### Network Interface

|            |                                             |
|------------|---------------------------------------------|
| Interface  | Ethernet 10 Base-T or 100 Base-TX Connector |
| Connectors | RJ 45 Female                                |
| Protocols  | Modbus TCP/IP, TCP/UDP, Telnet, DHCP, HTTP  |

### Indicators (LED)

|        |                   |
|--------|-------------------|
| Red    | Power ON          |
| Yellow | Connection Status |
| Green  | Transmit Data     |
| Yellow | Receive Data      |

### Power

|       |                |
|-------|----------------|
| Input | 8-24 VDC . 12V |
|-------|----------------|

### Environmental

|           |                 |
|-----------|-----------------|
| Operating | 0 °C to 55 °C   |
| Storage   | -40 °C to 66 °C |

### Packaging

|                    |                           |
|--------------------|---------------------------|
| Dimensions (LxWxH) | 79mm(L) x50mm(W) x18mm(H) |
| Weight             | 30g,                      |
| Warranty           | 6 Months                  |
